- 2004-05 X, Kendriya Vidyalaya - Jhansi.

PROFESSIONAL EXPERIENCE

- | | |
|--------------------------------------|---|
| At present
Mar 2021 | Member of Technical Staff, PAYPAL, Bangalore <ul style="list-style-type: none">> <i>Unified onboarding</i> : designing a system to unify the different onboarding application on PayPal under same umbrella. Idea is to do all the data collection in a single go actively instead of doing re directions or letting user manually figure out the restrictions imposed on an account and then provide the required information. It would also present all capabilities available to user in single place. <div>Node Javascript React Redux Bootstrap Java Springboot Raptor</div> |
| Mar 2021
Aug 2018 | Software Engineer 3, PAYPAL, Bangalore <ul style="list-style-type: none">> <i>Introduction of a new mid-tier application</i> : we created a new mid-tier application to cater to compliance requirements of different clients which was done previously via a monolithic web application. it posses serious limitations in terms of controlling the he UI experience and customisations for mobile clients. Initiated and drove this project from design to implementation while managed a team of 6. Effort recognized with an <i>award</i>.> <i>Unification of two policies</i> : originally in order to complete two different policies like KYC and Fatca user must complete them individually. Unification made it simpler by joining the two different but related policies into a single experience. Lead this effort and managed a team of 3.> <i>Introduction on Crypto on PP</i> : in order to transact cryptocurrency, mandatory policies were introduced on new platform. Effort recognized with an <i>award</i>. <div>Node Javascript Typescript Machina React Redux Bootstrap Yum</div> |
| Mar 2018
Aug 2017 | Software Engineer 2, PAYPAL, Bangalore <ul style="list-style-type: none">> <i>Mobile integration with web view</i> : enabled mobile integration by first making the web pages responsive followed by created an integration pattern for using them in a web view with the help of JS bridge. Effort recognized with an <i>award</i>.> <i>Error framework</i> : create two different modules for handling the errors on server and UI side. Same was later adopted by other teams for uniformity between differerent applications. <div>Node Javascript React Redux Bootstrap Formsy</div> |
| Aug 2017
Feb 2016 | Software Engineer 2 , CITRIX, Bangalore <ul style="list-style-type: none">> <i>Atomic and Intermediate Configuration - NetScaler</i> : Imposed the atomicity by introducing the transactions, formed by clubbing all related commands which to make sure either all or none of the commands get executed. Effort recognized with an <i>award</i>.> <i>Update Notification - NetScaler</i> : Introduced the notification bell to provide the system related notifications such as update notification by reading the RSS feed to available downloads. <div>Javascript css3</div> |
| Feb 2016
Aug 2014 | Software Engineer, PHOTON, Chennai Bangalore <ul style="list-style-type: none">> <i>KeyBank</i> : created a responsive single page banking application for Keybank from scratch following TDD.> <i>Maritz</i> : created module for hotel room booking which consisted development of a login page,hotel selection page and room selection page.> <i>Walgreens</i> : developed a page used for fitness tracking. It uses the fitness related user specified data to create graphical representation of aforementioned using highcharts. <div>Tomcat Angular JS jQuery Bootstrap Karma Chai Sinon Supertest Protractor Highcharts</div> |
